

SITE RESEARCH

Net ball courts flat Site

Footprint of 300m² site available for the Year 3 SENIOR common room

There will be too much shade for the social part of the building and the wind cold and will not make this area a comfortable place to rest or recreation in.

This orientation is not ideal because the sun does not hit the areas that are going to be most occupied by the students.

The sun does not hit the areas of the building most used.

3

- Kitchen cramped
- Laying stress and tension
- Big space for meetings
- Hang-out
- Study space needed
- Outdoor space needed
- Eating space

Large wide space on ground floor good for Meetings and gathering for the seniors of the school.

Large Deck for Recreation area is a good idea with sun facing North.

Upstairs however, not enough windows allowing fresh air through the common room which limits use of upstairs.

Kitchen cramped, Not Enough space for seniors to make food and eat. Not Efficient for 400 students.

good size chilling space for relaxation and teachers. Great for a decent amount of student use.

Existing SCR Scale 1:100

4

DESIGN DEVELOPMENT

I have considered the roof & come up with a flat roof with pillars to create movement.

The pillars have created movement for the building.

I have considered the windows and created much more aesthetic movement.

These windows have also given the students more view of the school.

DESIGN DEVELOPMENT

I have considered the brick shape for the building and have changed it to create a more stable approach.

I need to think about giving the building some outside area for the year 3 eggs students because it's quite popular.

I have considered the deep & chosen one that has given the building more formal view.

This has given them more option of where they can rest.
