

Design Developments

I am going to keep the look of the salt and pepper shaker very much the same but I am developing the mechanism of the grinder such as how it will be assembled

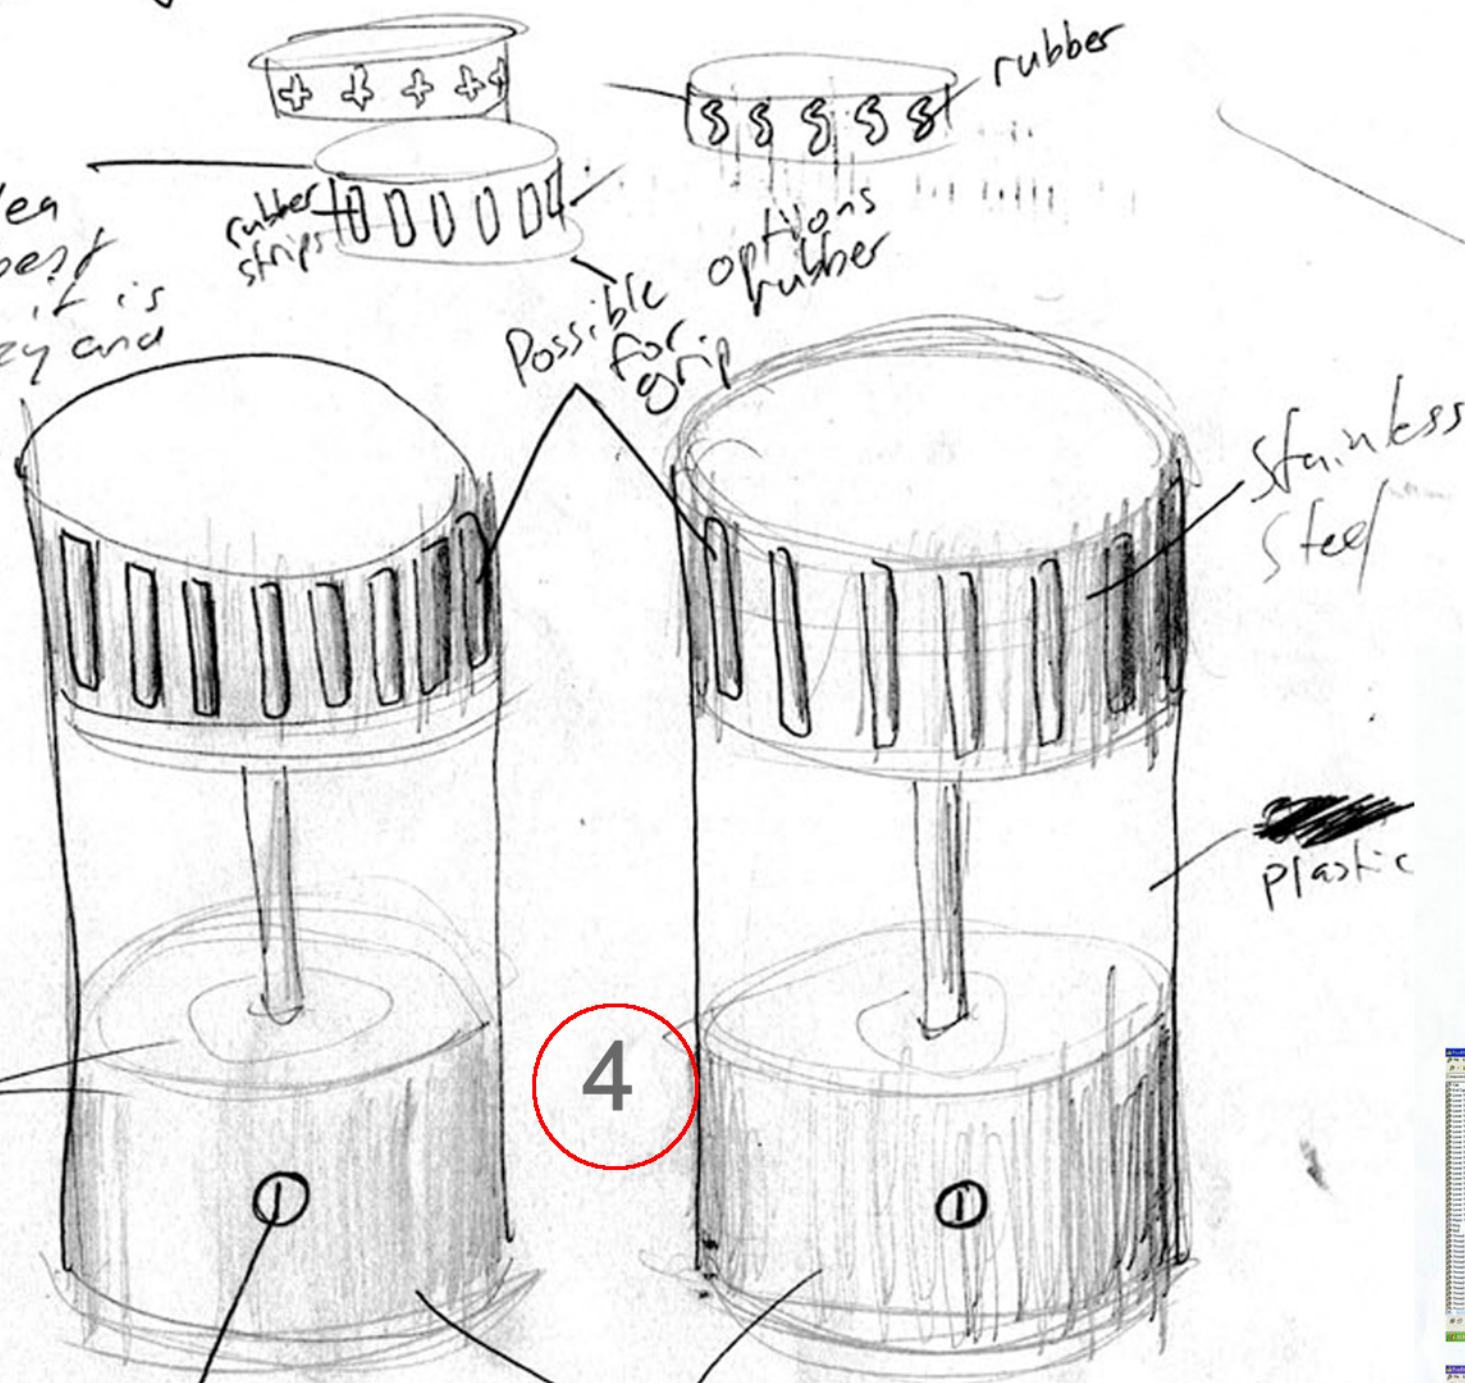

I may add plastic in some rubber into the design so that it does not slip in the users hand while they are using it

3 This is the idea I like best because it is not crazy and wild it is just simple and will appeal to a wider range of people

one piece joined by Glue

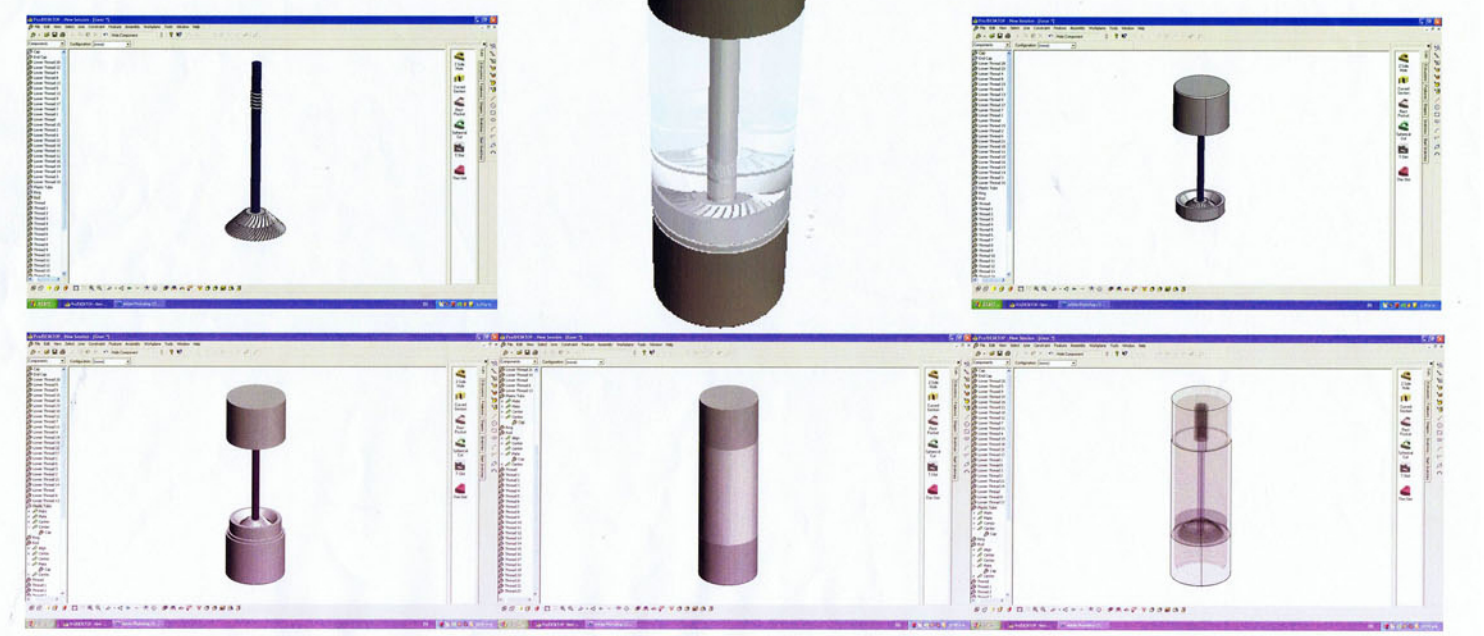

Screw holds the grinding ring in place

cap on the bottom that clips on
